ApexCore EdgeServer X900 - Technical Specifications

Document ID: SPEC-X900-2025 | Page 1: Hardware & Performance

1. Processor & Computing Power

The ApexCore X900 is powered by dual 32-core UltraScale ARM64 CPUs clocked at 3.4 GHz.
It includes an integrated Neural Processing Unit (NPU) capable of 120 TOPS for edge AI inference.

2. Memory & High-Speed Storage

Configured with 128 GB ECC DDR5 RAM expandable up to 512 GB across 8 memory channels.
Storage features dual redundant 2 TB NVMe PCIe Gen 5 SSDs operating in RAID 1 configuration.

3. Power & Active Cooling

Features hot-swappable dual 850W titanium-rated power supplies with 96% energy efficiency.
Liquid-vapor chamber cooling maintains CPU temperatures below 65 C under continuous maximum load.

ApexCore EdgeServer X900 - Compliance & Warranty

4. Operating Environment & Ingress Protection

Operational temperature range is -20 C to 55 C (-4 F to 131 F). Relative humidity: 5% to 95% non-condensing. Chassis is certified IP67 water and dust resistant, designed for outdoor cellular base stations.

5. Manufacturer Warranty & Replacement Terms

Every X900 unit includes a comprehensive 3-year enterprise hardware warranty covering full part replacement. Defective modules receive next-business-day expedited courier dispatch anywhere in North America and EU.

6. Support & Return Window

Direct tier-3 engineering support is available 24/7/365 via support@apexcore-systems.com.
Customers may initiate a no-questions-asked hardware return within 45 days of initial deployment delivery.
